Bothell, WA. 98021

(Course payment using a credit card can also be made by phone. Contact the instructor directly at (206) 679-5788 to register/make payment.)

Course Overview:

CDR Technician Certification - Day 1: This course is designed to familiarize the student with the Bosch CDR System, show them how to use the CDR software, provide an understanding of the components necessary for imaging a supported vehicle, and the steps required to properly image crash data from a supported vehicle without compromising or corrupting the data file.

CDR Technician Certification - Day 2: This hands-on extension follow-up to the Technician Day 1 course offers the student guided instruction in the following:

1. In-Vehicle DLC data imaging
2. Module location and identification, plus direct-to-module data imaging
3. Practical booster pack and adapter applications
4. "Back Powering" in-vehicle systems to enable DLC data imaging

Hands-on instruction, combined with Trainer/Mentor evaluation, and a passing score on the 25-question course exam completes the CDR Technician Level Certification.
